

## ABOUT

Harness the capabilities of ChatGPT within your organization, ensuring your data remains securely within your company's infrastructure. **keyIT Secured GPT** is designed to revolutionize the way your employees work, serving as a powerful tool to:

- optimize tasks,
- save valuable time by streamlining repetitive processes,
- focus on higher value-added activities.

From drafting responses and summarizing texts to facilitating brainstorming sessions and generating content for presentations, the capabilities of keyIT Secured GPT offer a wide range of applications within your organization.

## SECURED GPT:

**Multilingual:** English, Spanish, French, German, Portuguese, Italian, Dutch, Russian, Arabic, Chinese.

**Availability:** 24/7

**Communication Styles:** Business, Formal, Informal

**Configuration Options:**

- System prompt settings
- Customization of response size
- Selection of logo and naming for your **Secured GPT** during its integration with Microsoft Teams.

## TECHNICAL SPECIFICATIONS:

**Platform:**

Microsoft Azure, hosted in Switzerland

**AI Technology:**

Azure Open AI – modèles : GPT-4o, text-embedding-ada-002

**Integrations:**

Microsoft 365 (Microsoft Teams, SharePoint Online)

**Deployment:**

Customized within your own Azure infrastructure.

## FEATURES:

- Questions & Answers (Q&A)
- Text Generation
- Text Summarization
- Translations
- Code Generation in various programming languages.

## CAPABILITIES:

- Utilizes LLM model GPT-4o, trained on a diverse set of Internet data.
- Analyzes documents attached within conversations for detailed insights.
- Extracts and interprets content from web pages.
- Evaluates content from document libraries, including M365 and SharePoint Online.

## SECURITY:

- **Encryption:** End-to-end encryption of data both in transit and at rest. Utilize your own encryption keys via Azure services.
- **Authentication/Authorization:** Chatbot usage is restricted to users within a specified security group on your Microsoft Entra ID tenant.
- **Network Security:** Infrastructure relies solely on private endpoints. The chatbot is accessible from any authorized location or device, adhering to the same security policies (conditional access) applied to your mobile applications like Outlook, Microsoft Teams, or PowerBI.

## DASHBOARD:

Provides comprehensive monitoring of keyIT Secured GPT adoption and usage within your enterprise.

## SUPPORT AND MAINTENANCE:

- **Monitoring:** Continuous surveillance of both infrastructure and chatbot systems, providing metrics on functionality, detected errors, performance, and usage.
- **Updates:** Regular updates to incorporate new technologies and features as requested by clients.
- **Technical Assistance:** Provided by our dedicated keyIT support team, tailored to the specifics of the chosen support contract.

## CUSTOMIZATIONS:

- **Analytical Capability:** Provides analysis of data from databases, specific document libraries, CRM, ERP, or any other systems within your enterprise (consultation required).
- **Additional Communication Channels:** Integration with platforms such as Alexa, Email, Facebook, Outlook, Skype, Slack, Telegram, and more.

## COMPLIANCE AND DATA PROTECTION

The interactions between your users (inputs) and the chatbot (outputs), as well as the enterprise data used by the chatbot (embeddings) and your training data (fine tuning), adhere to a strict data confidentiality and protection policy:

- **Data Non-sharing:** Your data are not shared with keyIT, Microsoft, OpenAI, or any other clients.

## COMPLIANCE AND DATA PROTECTION

- **Model Independence:** Your data are not used to enhance OpenAI models or for the automatic improvement of Azure OpenAI models. Although the models are stateless, explicit fine-tuning with your own data is possible without sharing these models.
- **Exclusive Access:** Fine-tuned Azure OpenAI models are exclusively available for your use.
- **Managed by Microsoft:** Azure OpenAI services are fully controlled by Microsoft. OpenAI models are hosted within the Microsoft Azure environment and do not interact with services operated by OpenAI.
- **Data Deletion:** Uninstalling the keyIT Secured GPT solution from your Azure environment results in the complete and permanent deletion of all related data.

## KEYIT SECURED GPT SOLUTIONS

Product Name	Features	Status
Secured GPT	Secure ChatGPT integrated into Microsoft Teams, guaranteeing the protection of your company's data, with support for document import and web page analysis.	Available
